DETAILED ACTION

Claims 1-19 and 22 are pending. The Preliminary Amendment filed 1/18/02, cancelled claims 20-21 and amended claims 3-22 and added claims 23-34.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-17, 23-34, drawn to a composition.

Group II, claim(s) 18-22, drawn to a method for treating a human suffering from a condition.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking groups I-II appears to be that they all relate to a composition comprising an anti-arthritis agent (green-lipped mussel extract) and at least one enhancing agent (an extract that exhibits antioxidant properties—fish oil).

However, XP 002154177 teaches a composition comprising green-lipped mussel extract and fish oil for a synergistic anti-inflammatory effect.

Therefore, the technical feature linking the inventions of groups I-II does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not define a contribution over the prior art.

Accordingly, Groups I-II are not so linked by the same or a corresponding special feature as to form a single general inventive concept.

Art Unit: 1617

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- 1) an anti-arthritis agent
- 2) an enhancing agent
- 3) a condition

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Claims 1-19 and 22-34 are deemed to correspond to the species listed above.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features because within the species listed above, are a great number of chemical compounds/compositions with vastly different chemical structures and properties. The combination of all these possible compounds/compositions leads to an even greater number of chemical combinations and properties. This is a burdensome search because one would have to search several different classes and subclasses.

Art Unit: 1617

A telephone call was made to Cary Kappel on 2/23/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
